

GEA Farm Technologies

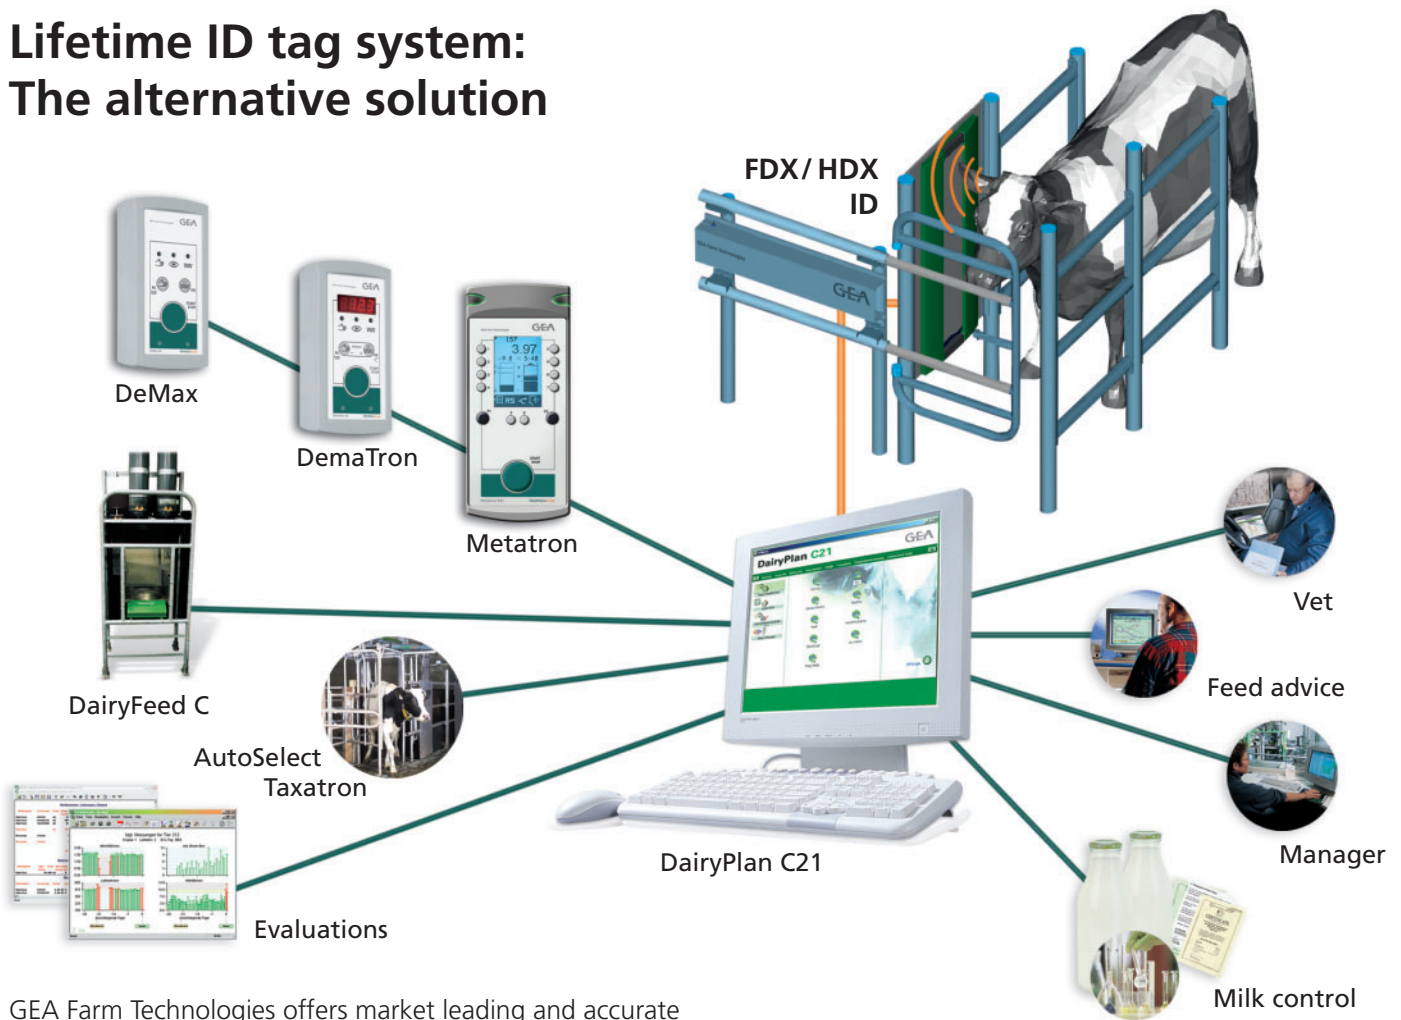

FDX / HDX

Lifetime ID tag system

GEA Farm Technologies – The right choice.

Lifetime ID tag system: The alternative solution

GEA Farm Technologies offers market leading and accurate identification systems as a premium product through its DairyManagementSystem 21 ID system. The new FDX/HDX ID system identifies high quality lifetime ID tags distributed by official organisations. It can be integrated into all types of GEA Farm Technologies technology, using ID systems to operate parlour ID, sort gates and feeding systems.

Take advantage of the highest GEA Farm Technologies quality ID installations to identify lifetime ID tags for cows:

- ✓ High-tech components
- ✓ High quality sender / receiver and antenna
- ✓ Professional installation
- ✓ Optimised installation with the ID lane (group parlours, rotaries, sorting)
- ✓ Reduced identification failures caused by animals that push past one another
 - Plastic components reduce interferences
 - Stable construction

The right type for any task:

Rescounter II –

- Identification with integrated activity measurement
- Reliable automatic heat detection
- Shorter intervals between calving

Neck-Responder –

- Robust identification with the best performance
- Easy to handle
- Good visual identification via collar number

Ear-Responder –

- Reusable ear tag

GEA Farm Technologies offers dedicated systems for sheep's and goats. Please contact your GEA Farm Technologies expert for further information.
