GEA Farm Technologies - The right choice.

M2M

Made-to-Measure through design

The M2M (Made-to-Measure) cubicle is a patent-pending design tested and developed by Kingshay the Independent Dairy Specialists.

The unique 38° bend of the upper cubicle allows you to

set the head rail at the ideal position to suit the height and length of your cows and heifers.

M2M also gives your

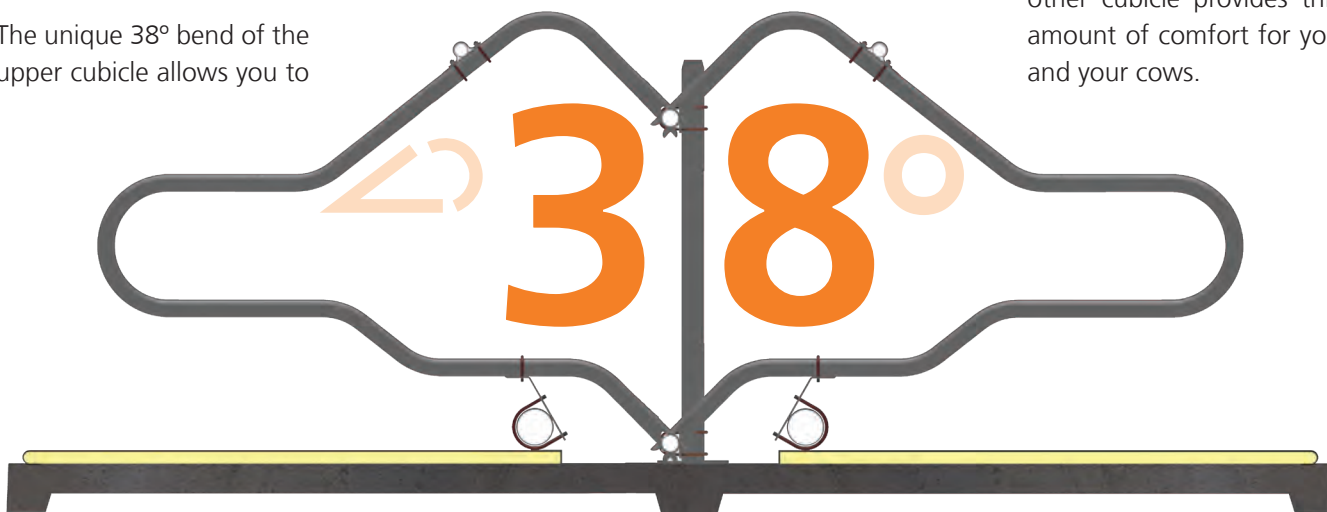

animals freedom of movement not only within the bed but also when they stand or lie down.

M2M can be used in any

situation because of its flexible design making it the first choice for deep litter or mattress bedding systems.

Follow our checklist – no other cubicle provides this amount of comfort for you and your cows.

Design Checklist at a glance

- ✓ High occupancy rates
- ✓ Spacious design
- ✓ Comfort and safety
- ✓ Excellent lunge room forward
- ✓ Lunge room sideways
- ✓ **Unique 38° angle provides simultaneous adjustment for both height and length**
